Project White Paper

Project Name: ERP Conversion, EDI Conversion TrustedLink to Extol Business Integrator™

Client Profile:

- Client is a wine and spirits company in Canada, and a subsidiary of a global wine and spirits holding company. The client produces and distributes branded and private label beverage products through wholesalers and retailers in a collaborative manner.
- **Industry:** Beverage Manufacturing and Distribution
- **Location:** Canada
- **Products:** Branded and private label beverages
- **Technical Environment:**
 - **Hardware(and OS):** MS Server 2003
 - **Software(and version):** Extol Business Integrator (EBI) version 2.2.1
 - **ERP:** JD Edwards Enterprise One (JDE E1)
 - **Communications:** Extol Secure version 5.3
 - **Relevant to the project...**
 - **Number of Trading Partners:** 3
 - **Number of Maps:** 3 (850, 855, 997)
 - **Number of Business Processes:** 3

Business Case (strategic, business area related):

- To meet requirement to be up and running on new EBI version 2.2.1 by July, 2009
- To move critical processes from JDE on AS400 to JDE Enterprise One on MS Server 2003 / Oracle using Extol Business Integrator
- To aid the client in avoiding compliance chargeback's
- Save company in EDI transaction costs and EDI infrastructure costs of maintaining 2 translation environments

Situation (technical, IT area related):

- Client was converting from JDE on AS400 to JDE Enterprise One on MS Server 2003 / Oracle
- Client was converting from TrustedLink to Extol Business Integrator
- Client needed to have test transactions from the new mappings and EBI available by April 2009 in order begin testing with the new JDE software

Solution / Deliverables:

- Provided one (1) Extol consultant to analyze existing maps, convert maps from Trusted Link to new EBI maps / software, install and test all processes
- Developed and tested the business processes (BPs) that accompanied these maps

Electronic Commerce Group

Project White Paper

- Setup, configured, and enabled the Perimeter Server to perform the communication and routing with Trading Partners to which test maps were related
- Performed custom remote Extol EBI training

Outcome:

- Maps were completed and ready for testing with the new ERP system
- Associated Business Processes were developed, documented and logged for reusability
- Custom scripts were provided to the client and further training will help to reinforce the scripts provided
- Client was pleased with the work accomplished and further testing will reveal cost savings with daily transactions exchanged with the VAN, and savings due to the integrity of the software and communications
